Written Questions

WQ9. Dr. Pannu to ask the Government the following question:

How does the Government explain the fact that the Heritage Trust Fund's Annual Report for 1996-97 indicates an overall rate of return of 8.5% for the Fund's investments when the Public Accounts for the same year (schedule 6, page 37) states the average "effective yield" is 3.63% for securities maturing within a year and 5.52% for securities maturing in 1 to 35 years on the bulk of our financial assets?

WQ10. Dr. Pannu to ask the Government the following question:

What is the main reason or reasons why Alberta Treasury Branch guarantees increased \$351 million, that is from \$125 million to \$476 million, in the 1994-95 fiscal year (see Contingent Liabilities, note 14, page 22, Alberta Treasury Branch's Annual Report) and what provisions for losses have been made or will be made in the future on this contingent liability?
